EVQ4475-R-00A

2.5A, 36V, Frequency Selectable Step-Down Converter with Single USB Charging Port

DESCRIPTION

The EVQ4475-R-00A Evaluation Board is designed to demonstrate the capabilities of MPS' MPQ4475. MPQ4475 integrates a monolithic step-down switch mode converter and one USB current limit switch with charging port identification circuit. It achieves 2.5A continuous output current over a wide input supply range with excellent load and line regulation.

The output of USB switch is current limited. MPQ4475 provides a USB Dedicate Charging Port (DCP) which supports Battery Charging Specification 1.2 (BC1.2), the Divider Mode, and 1.2V/1.2V Mode without the need of outside user interaction.

ELECTRICAL SPECIFICATION

Parameter	Symbol	Value	Units
Input Voltage	V_{IN}	7-36	V
Output Voltage	V_{USB}	5	V
Switching Frequency	Fs	250	kHz
Output Current	I_{USB}	2.5	A

FEATURES

- Wide 7V to 36V Operating Input Voltage Range
- Fixed 5V Output Voltage with Line Drop Compensation
- Accurate Output Current Limit
- 350kHz/250kHz/150kHz Frequency Selectable
- Programmable Line Drop Compensation
- Supporting DCP schemes for BC1.2, Divider Mode, and 1.2V/1.2V Mode
- ±8kV HBM ESD Rating for USB, DP, and DM Pins

APPLICATIONS

- Automotive USB Smart Charging Ports
- USB Dedicated Charging Port (DCP)

EVQ4475-R-00A EVALUATION BOARD

QUICK START GUIDE

1. Connect the positive and negative terminals of the load to the USB and GND pins, respectively.
2. Preset the power supply output between 7V and 36V, and then turn off the power supply.
3. Connect the positive and negative terminals of the power supply output to the VIN and GND pins, respectively.
4. Turn the power supply on. The board will automatically start up.
5. To use the Enable function, apply a digital input to the EN pin. Drive EN higher than 2V to turn on the regulator or less than 1V to turn it off.
